

CountEasy TS Coin & Bill Counter

The **CountEasy TS** employs a high resolution full colour TFT display with universally recognized icons for simplicity and ease of use. Simply remove the unit from the box plug in the A.C. adapter and optional printer and away you go. No need to read a complex user guide or spend hours playing around.

The **CountEasy TS** uses easy to understand universally recognized icons to simplify use and speed up the cash counting process.

The Facts

- Counts the entire contents of a typical register in less than 1 minute
- Counts on average, 6 times faster than traditional hand counting
- Highly accurate and easy to use
- Counts 500 coins in 0.2 seconds and 100 bills in 5 seconds or less
- Counts silently with no moving parts
- Intelligent device - the Volumatic count easy TS automatically recalibrates itself as it is used to provide accurate counts everytime.
- Stores up to 200 register ID's and names
- Stores multiple operators ID's
- The Count Easy TS is ideal for any business that accepts cash payments and has to count and balance cash drawers, cashiers, shifts, daily totals

BENEFITS OF THE CountEasy TS

- Intuitive design and menu driven software make using the **CountEasy TS** so simple that practically no training is required.
- The use of universal icons, rather than words or abbreviations, makes training a breeze.
- Counts up to 200 registers around your store and operates with AC or rechargeable battery so it is fully portable, compact, and can be used anywhere needed.
- Intelligent battery management software means the **CountEasy TS** can operate for an entire day on battery power. The battery pack is fully rechargeable in just over 3 hours.
- Non-volatile memory means that data will not be lost in the event of an unexpected power failure.
- No need to manually key in data. The TS, uploads all data to any cash spreadsheet or back office system quickly and simply- eliminating keying errors and saving time.
- Keeps a real-time running total, so you always know where you are in the count, with real time running clock and date stamp for audit integrity.
- Six times faster than counting by hand and more accurate.
- **CountEasy TS** will store up to 200 float values and make the preparation of cash floats a breeze.
- Fast and efficient way to account for rolled coins, loose, or bundled bills.
- Allows you to count and balance a cash drawer quickly and accurately.
- Weighing mode allows you to weigh non-cash items such as vouchers and tokens.
- Small footprint takes up minimal desk space.
- Adding a printer allows the cashier to sign a hard copy of every count, providing a clear audit trail.
- Future proofed to accept new bills and coins.
- Intelligent learning software means bills in all conditions and environments are counted accurately.
- Unlike some machines there is no need for regular recalibration.
- Complete peace of mind with **GEMSYS** 5 year after sales service and support program.

Functions

Counts loose, bagged and rolled coins

Counts loose, bundled and sleeved bills

Counts coupons, vouchers and tokens

Onboard memory stores data for 200 registers (fully editable)

Enter float values for all registers

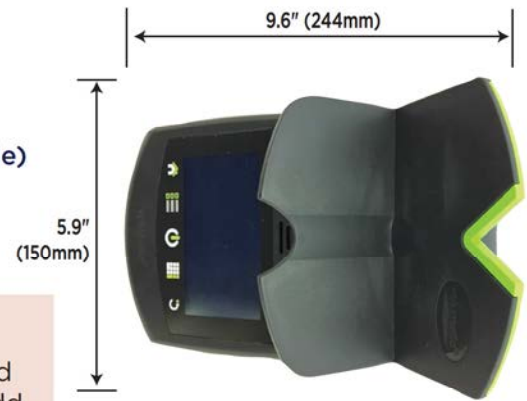

Multiple currency options

Features

Space saving design frees up desk space. The TS can be ordered with an integrated printer (model TSIP) for greater flexibility. Add an optional thermal printer to print a full breakdown in seconds. Built in communication ports provide connectivity to various cash management software. Plug and play data transfer to back office software, Websafe™ cash management software Excel, notepad. Real time clock date and time stamp all transactions.

Benefits

Adding the optional journal printer or implementing direct data transfer will reduce mistakes, and transposition errors associated with manual record keeping and keying errors. Providing a legible and detailed audit trail for accounting and loss prevention will save additional time.

Weight 2 lbs (0.91kg)

FEATURES & SPECS

Battery/Power Adaptor Input Current 0.8A Max

Battery/Power Adaptor Input Voltage Range
100 VAC (-10%) to 240 VAC (+10%)

Power Adaptor Output Current 1.5A Max

Power Adaptor Output Voltage 9V DC

Battery Specs

- Type: NiMH AA Pack with integrated temperature sensing (battery is user-replaceable via screw-fixed cover)
- Specs: 3.6C, 1800mAh
- Life: ~12hrs with default settings and typical daily usage
- Charge Time: ~3 hours

Dimensions

- Width: 5.9" (150mm)
- Height: 5.7" (145mm)
- Depth: 9.6" (244mm)

Weight (excluding power adaptor) 2 lbs (0.91kg)

Power Adaptor Connector Dimensions

2.5mm center +ve, jack socket

Scale Load Capacity 2.2 lbs (1kg)
