Impressive Standard Features

The NC7100 provides fast and accurate counting of Canadian and U.S. currencies. Other currencies are available. The NC7100 provides several modes of operation including “mixed” mode, giving the ability to count mixed bills in a single pass and provide the total dollar value as well as the individual value for each denomination counted. Select “Issue” mode and sort paper from polymer bills saving countless hours.

Improve Accuracy; Ensure Savings!

The NC7100 will save you hours of time counting and processing bills, and will provide superior performance compared to old style currency counting technology. Accurate and reliable performance every time will ensure that you’re not wasting valuable time reprocessing bills. NC7100 utilizes the most reliable image processing technology combined with superior mechanical reliability to deliver fast accurate results every time you use it.

Reliable and Fast

The NC7100 is a commercial quality currency processing device, designed to meet the day-to day challenges of processing and counting in banking, foreign exchange, retail, and gaming environments. With its unrivaled accuracy, versatility and speed, the NC7100 will simply outperform competitors. Variable count speeds up to 1500 bills per minute, selectable pre-set batch settings or user selectable batch settings can all be accessed using the 10 digit keypad.

Big Savings in a Small Package

With a modern design, full graphic 2.8” LCD display, and a user-friendly interface, the NC7100 provides the user with a simple, efficient device to improve productivity and count accuracy. This compact desktop counter (H 13.8 in x W 13 in x D 13 in) provides more functions than a standard currency counter. Functions such as rejecting “suspect” bills into the reject pocket without stopping the count, network connectivity, accurate counterfeit detection and rejection are just a few.

Specifications

- Weight:** 15 KG (33 lbs)
- Countable Note Size:** 60 x 85 x 0.08 mm
- 100 x 190 x 0.12 mm
- Counting Speed:** 600/900/1500 NPM
(<800 notes/min)
- Hopper Capacity:** Max. 500 notes
- Stacker Capacity:** Max. 250 notes (circulated)
- Reject Capacity:** Max. 100 notes (circulated)
- Batching:** Five pre-set batches
(10, 20, 25, 50, 100)
and variable 1 to 999
via numeric keypad
- Power Supply:** 100-240 VAC, 50/60 Hz
- Dimensions:** H 13.8 in x W 13 in x D 13in
- Options:** Remote Display
